

Windows 2000 Emergency Repair Disk

Problem

When you install Windows 2000 you will find that there is no option to create an emergency repair disk.

Applies To

Microsoft Windows 2000

Solution

1. Click on *Start* | *Programs* | *Accessories* | *System Tools* and then select *Backup*.
2. Click on the *Tools menu*.
3. Select the option *Create emergency repair disk*, and follow the instructions on the screen.
4. Make sure that you keep the disk in a safe place, as you never know when you will need it!
